
Course Name :

Control Panel for Elevator

DESCRIPTION :

About :

- 1- Control system types and description Of contactor, rely
- 2- Main contactors for the drive motor and Rectifiers for the brake magnet
- 3- Full electronic card control system
- 4- Frequency converter CPI
- 5- The infrared for diagnostic system and Inter face for the electronic panel

Course format :

***_theoretical**

What you will learn :

- 1- Control system types and description Of contactor, rely
- 2- Main contactors for the drive motor and Rectifiers for the brake magnet
- 3- Full electronic card control system
- 4- Frequency converter CPI
- 5- The infrared for diagnostic system and Inter face for the electronic panel

Who should attend :

- * Electric engineer (power- communication)
- * Mechanical engineer

PREREQUISITES : participants should have prior knowledge of :

- *_He has already worked in the field

OVERVIEW :

CONTROL PANEL For Elevator

DURATION : 16 hours / 4 Days

LEVEL : 1

LANGUAGE INSTRUCTION : English / Arabic

ACTIVITIES :

- Exercises .
- Final examination .
