

Course Name :-Diesel Engine

ABOUT :- theoretical

WHAT YOU WILL LEARN: -

- Make a relationship between the theoretical theories and the actually applications in diesel engines.
- Make a maintenance planning and apply it.
- No-break generating set unit

WHO SHOULD ATTEND:-

- Engineers.
- technicians

COURSE CONTENT:-

- Units
- External & internal combustion engines.
- The main parts of diesel engines.
- Intake air, fuel, cooling, exhaust, lubrication and super charging systems in diesel engines.
- Maintenance planning of diesel engine.
- No-break generating set units.

DURATION: - 60 hours / 15 Days
